EXPERIENCE

HIV Integration Advisor

Pact Tanzania - USAID Kizazi Kipya Project 📅 03/2020 - Ongoing

USAID Kizazi Kipya Project is working to transform the lives of vulnerable Tanzanian children and young people, particularly those affected by HIV.

- Improved viral suppression rate of CLHIV from 82% to 91% by liaising with National AIDS Control Program (NACP) in developing a portal to access HIV data of Orphan and Vulnerable Children living with HIV (CLHIV) for the Kizazi Kipya project to improve monitoring of adherence retention and their viral load status.
- Boosted the outcome along the 95-95-95 goals and continuum of care by rolling the Children Living with HIV Package to provide beneficiaries with specific package item.
- Increased the enrolment of the beneficiaries into OVC project by establishing a Children Living with HIV register at facility level.
- Boosted optimal regimen beneficiaries from 85% in March 2020 to 99.5% currently by identifying and followed up on Children living with HIV on legacy regimen and switched them to optimal regimen with the support of clinical implementing partners.
