To whom it may concern

Lina has been an employee here at Softmed Company Ltd since last year. And in the time that I have known her, she has been a delight to work with, bringing her resilience, attention to detail, and sharp collaboration skills to every project she has worked on for the company. Her communication and people skills, and knack for always knowing what the company needs and bringing it to life are excellent, and she has some good innovative ideas.

In the time I've known her, she has consistently proven herself to be a strong employee eager to learn and make corrections, capable of heading big projects and executing tasks to the fullest with little or no supervision.

She also ensures that she completes her assignments diligently. Lina remains cheerful and steadfast in the face of tough deadlines and is always available to assist co-workers whenever necessary.

Lina would be a great fit for ESAMI University, building deep-rooted relationships and ensuring successful events.

I can highly recommend her for the Project Management course she is applying for, as I believe the skills, she has developed in this company for the past 1 year, will certainly come in handy for your institution, as well as the course department.

She is well suited to take on the challenges it poses. Lina is talented, and everyone here wishes her all the best with her studies at ESAMI University.
