

## **RECOMMENDATION LETTER FOR GRACE KALUA**

To whom it may concern,

It is with great pleasure to write this recommendation letter for Grace Kalua regarding her application for a master's in project management at your Institution. I have known Grace since 2017 when she had just joined management sciences for health as project specialist. Over the years, she grew in her career to a HIV clinical mentor, and currently still working with her as a linkage nurse at Elizabeth Glaser Pediatric AIDs foundation (EGPAF).

During her 5 years both at MSH and EGPAF, I have worked with her as her immediate supervisor, and she has been instrumental to the programs department regarding implementation of the large portfolio of projects that we have been implementing.

Over the years, Grace has been known as an officer who is eager to learn such that she came with little knowledge in project management and HIV management but now she has acquired some knowledge and experience in project management.

Having worked as her immediate supervisor, I can confirm that Grace is a hard worker and strong-willed person. She is a determined and persistent person in achieving goals. She accomplishes tasks and assignments given to her in time

It is with the same quest for knowledge that she has recently been making enquiries for project management post graduate courses to strengthen her academic qualification.

Grace is currently working with Elizabeth Glaser pediatric AIDS foundation as a linkage nurse. Her current rolerequires advanced knowledge in project management to effectively deliver on her duties and responsibilities. It would therefore be a great capacity development intervention if she is admittedand undergoes the program she has applied for. It would not only lead to her professional development but the organizational development as well.

If there is any need for more information, don't hesitate to contact the writer using the following information.

Elton Masina
